Subject: RE: Chuitna Coal Water Management Plan

Hi Phil,

Thanks for sharing this with us. I'm glad to see that you copied Jamey, as the Region has the lead for this project and HQ is providing support. The Region is, I understand, considering how they might use the reports, so follow up would be with Jamey.

Thanks for getting in touch; it's nice to hear from you. I hope things are going well with folks at Anchorage FWS. Hi Lori!

Best, Rachel

Subject: Chuitna Coal Water Management Plan

Rachel, I was just speaking with Heather Kendall-Miller about the Chuitna Coal water management issue and she said she had provided you with a draft of the Stratus report. The USFWS had Bob Prucha review the water management plan and he provided us with extensive comments. I am providing you with his draft comments. At this point, while I think Bob raises lots of valid concerns I just do not have the technical expertise to fully understand his comments.

I need to send a letter to the Corps about this but without understanding the extent of the issue, I cannot do that. Does EPA have anyone with the technical capability to help us understand this?
